BHADRAK, ODISHA

## OBJECTIVE

---

Enthusiastic developer with experience in building web-based dashboards and RESTful APIs using Python and JavaScript. Seeking an opportunity to apply full-stack and analytical skills in a growth-oriented organization.

## SKILLS & ABILITIES

---

**Web & Backend Technologies:** HTML, CSS, React JS, Django

**Databases & Storage:** MySQL

**Programming Language:** C, Java, Python

**Core Concepts:** Data Analysis, Face Recognition, Workflow Automation RESTful APIs

## EXPERIENCE

---

FEB 2025 - PRESENT

### INTERN INFOSYS SPRINGBOARD

- Developed an interactive Cyber Threat Visualization Dashboard to analyze and monitor simulated security incidents.
- Designed RESTful APIs using Python and Flask to process and serve cyber threat data.
- Implemented dynamic data visualizations (bar, pie, line charts) using JavaScript and Chart.js for actionable insights.

DEC 2025 – JAN 2026

### WINTER INTERN INDIAN OIL CORPORATION LIMITED

- Developed SPARK, a web-based industrial access and safety management system using Python and Django.
- Implemented digital permit workflows, face recognition, and PPE verification for secure gate validation.
- Designed rule-based attendance automation with real-time permit checks and manual security confirmation.
- Built centralized logging and audit trails using SQLite and OpenCV following industry-aligned practices.

## EDUCATION

---

2023 - 2027

**BTECH IN COMPUTER SCIENCE (PURSUING)**  
GIET UNIVERSITY  
**CGPA: 7.23**

2021 - 2023

**HIGHER SECONDARY (12<sup>th</sup>)**

AIMS HIGHERSECONDARY

**GRADE: 74%**

2020 – 2021

**SECONDARY (10<sup>th</sup>)**

A.A. HIGH SCHOOL

**GRADE: 82%**

## CERTIFICATION

---

**NPTEL CERTIFICATION:** Python for Data Science

**INFOSYS SPRINGBOARD:** Data Science

**INFOSYS SPRINGBOARD:** TechA Data Analytics using Power BI Foundation Certification

## PROJECTS

---

### **I. Development of Interactive Cyber Threat Visualization Dashboard**

Built a web-based cyber threat monitoring dashboard with RESTful APIs using Python (Flask) and JavaScript. Visualized attack types, severity, and trends through interactive charts for efficient threat analysis.

### **II. SPARK - Smart Permit and Risk Knowledge System**

Developed a paperless permit-to-work system with multi-level approvals, face recognition-based employee verification, & permit validity checks. Integrated department-wise PPE compliance logic to enhance workplace safety and risk control.

Repository Link: <https://github.com/ManasaBarik/SPARK.git>

### **III. KhetiBandhu:**

KhetiBandhu a smart digital companion for farmers. This platform is designed to guide farmers step by step, giving them accurate predictions, weather updates and farming tasks, all in their own regional language.
